

AAI 5.56MM PLASTIC MAGAZINE

for M-16, AR-15, and GALIL Assault Rifles

GENERAL

AAI's magazines are made of glass-reinforced thermoplastics for automatic rifles. In addition to its inherent self-lubricating properties, the material ensures mechanical strength, chemical resistance and stability over a wide temperature range.

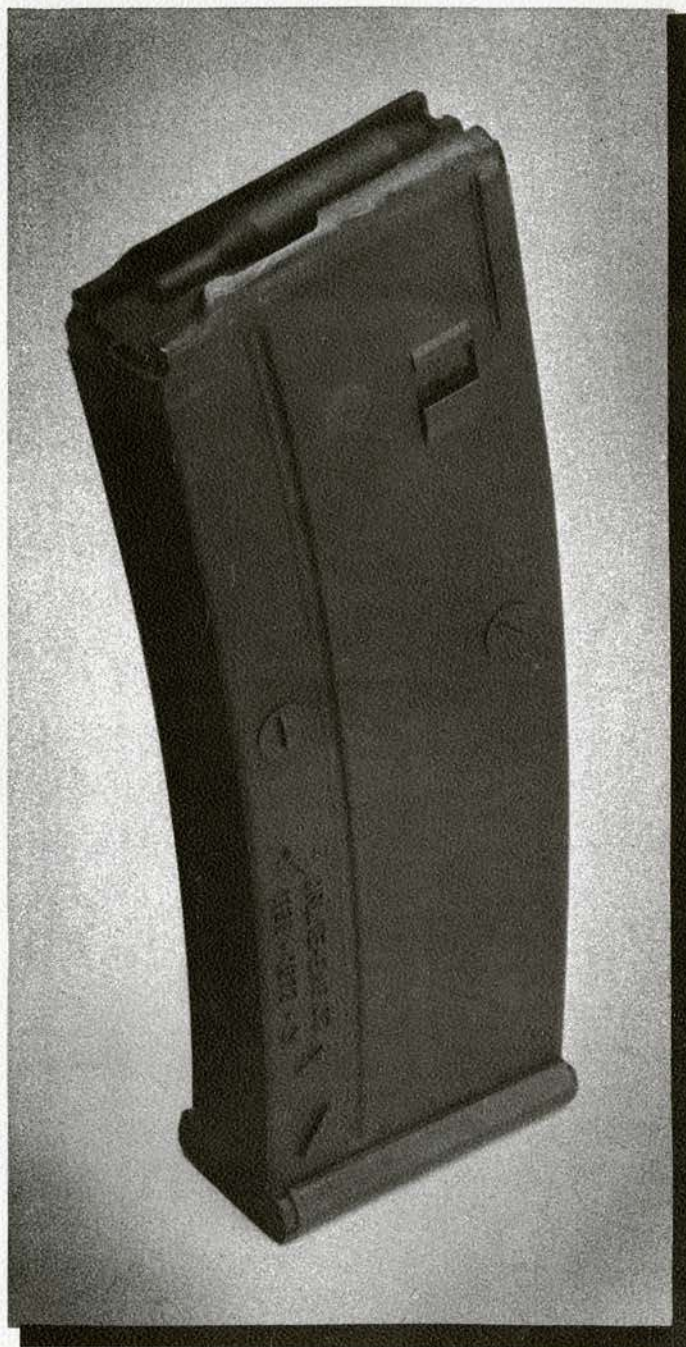

Plastic magazines are easy to clean and to handle. They resist distortion and are cost-effective. For these reasons, the Israel Defense Forces has switched from aluminum magazines to the plastic AAI model. The magazine is presently being evaluated by ARDEC for adoption by the U.S. Army.

DESIGN FEATURES

- 30 round capacity
- Manufactured from glass-reinforced nylon.
- Meet IDF Specification Nos. 21144 (2415), 6044 and 12512 (2435) 6044.

ADVANTAGES

- Impact-resistant.
- Lighter than metal magazines.
- Accurate dimensions and smooth surfaces.
- Corrosion-proof, chemical-resistant.
- Withstand extreme climatic conditions.
- Maintenance-free.
- Field tested reliability.
