A man in a cowboy hat and tactical vest with a rifle and tomahawk. The man is shown from the back and side, wearing a dark tactical vest over a white long-sleeved shirt. He has a modern assault rifle slung over his shoulder and a tomahawk in his right hand. The background is a dark, textured surface with horizontal stripes and stars, reminiscent of the American flag.

POF  **USA**

An American Revolution in Innovation

2015

American Patriots,

Patriot Ordnance Factory (POF-USA) stands out in the firearms industry.

My vision is to create the finest American made weapon systems that fellow American Patriots can call the "Ultimate Fighting Machines" in defense against tyranny. We are not offering "me too" products for the main focus of maximizing profits. Our goal is to ensure that you benefit from the competitive advantages that come from POF-USA.

My main objective, and that of my team, is to design and manufacture what we call an American Revolution in Innovation. Freedom... our individual right of choice is the reason free men innovate.

Think about this, free men innovate and dictators imitate. This is why America has advanced faster than any society in the history of mankind. Freedom is all inspiring and IS worth defending and fighting for! This is who we are and so much more.

As free men, we bow to no one. Our core passion is to compromise on nothing. "Ultimate Fighting Machines" in defense against tyranny must be tough, accurate, modular, durable and true. We refer to our American Revolutionary Industrial designs as "PATRIOT." All elements of PATRIOT must contain Passion, Authenticity, Trustworthiness, Rebellion, Independence, Objectivity and Truth. That is who we are, and all of our products are a reflection of those traits. I am proud to be an American with the ability to bring you products engineered to defend us against tyranny, but easily used for hunting, competitive shooting, protection and are built for longevity. Our children's children deserve the very best...that is what we offer for now and the future.

All raw materials, machining, labor, processes, coatings and platings - not only in our weapon systems, but accessories as well - must be manufactured in the USA, by American Patriots. I'm very privileged to say that from design to manufacturing phases our passion and focus is pure American Patriotism in the name of Innovation continuing as our freedoms continue.

We exist because of our individual right of choice and fellow Patriots chose to give us an opportunity. For this we are thankful and will continue our endless pursuit of continuous improvement and innovation.

I look forward to meeting and hearing from many of you over the coming year and appreciate your interest in the Patriot Ordnance Factory product line.

Freedom breeds innovation. Let Freedom ring!

Frank Z. Oha

E² EXTRACTION TECHNOLOGY

SEE AN ANIMATED DEMONSTRATION AT: POF-USA.COM/ESQUARED

E² CHAMBERS ARE BUILT INTO EVERY RIFLE WE MAKE

POF's patented E² dual-extraction technology consists of four small channels cut into the walls of the chamber allowing a small amount of gas pressure to push against the neck of the spent case. This pressure assists in extraction by breaking the seal between the chamber and case as well as pushing the spent case to the rear as the extractor is pulling to the rear. This removes a tremendous amount of work that would otherwise be left up to the extractor.

The extractor is now pulling on a dislodged cartridge case. With the addition of this feature, your extractor can last up to five times longer than it would in a standard chamber! This push/pull dual extraction system has proven extremely valid in our commitment to increasing the reliability of the AR platform.

MODULAR RAILED RECEIVER™

The patented Modular Railed Receiver (M.R.R) is POF's crown jewel for precision and extreme rigidity. This is a two piece upper assembly with a free-floating monolithic handguard that slides on and interfaces directly to the upper assembly thanks to our upper's reinforced backbone. This backbone is five-times thicker than standard flattop platforms.

The suspended handguard keeps your grip and accessories from weighing on the barrel and with the help of our heat sink barrel nut, reduces stress and flex in the barrel extension area. This ensures both extreme rigidity and accuracy by directing stress risers toward the upper assembly's strongest, most reinforced materials.

GEN⁴

GEN 4 LOWER RECEIVERS

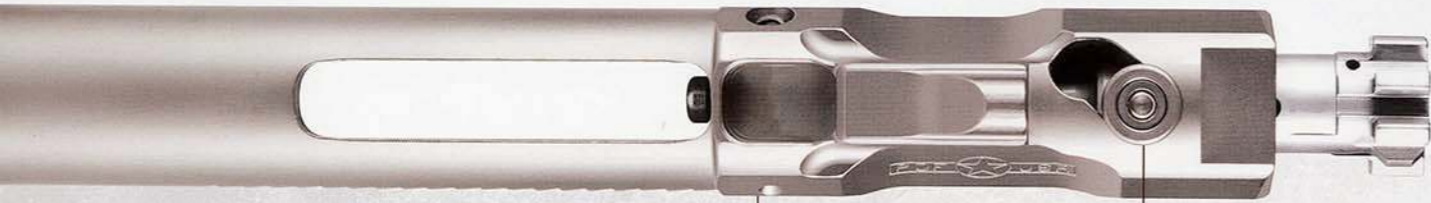

GEN 4 FEATURES

- 1. Ambidextrous Bolt Release with Enhanced Bolt Catch
- 2. Ambidextrous Safety Selector
- 3. Receiver Tension Screws
- 4. Oversized Mag Well Flare
- 5. Ambidextrous Recessed Finger Rest
- 6. Ambidextrous Magazine Release
- 7. Oversized Integrated Trigger Guard w/ Grip Relief
- 8. Ambidextrous Bolt Hold Open

PROPRIETARY ENHANCEMENTS

ONLY FOUND ON A POF RIFLE

BOLT CARRIER GROUP

Our one piece NP3 plated bolt carrier is manufactured with the mechanical key built into the body and positioned behind the cam pin. This patented design helps reduce carrier tilt. Our bolt carrier group features a chrome plated bolt, extractor, and firing pin. The finishes are both corrosion resistant and introduce lubricious characteristics to the action.

ROLLER CAM PIN

Our patented roller cam pin is just one more example of how we strive to reduce friction and drag in the action. Standard AR cam pins feature a square steel head that literally grinds and carves away at the inside of the receiver. POF's NP3 coated roller head actually rolls inside the channel of the upper thus eliminating friction and prolonging the life of the upper.

TRIPLE PORT MUZZLE BRAKE

Designed to precisely compliment the POF platform our nitride heat-treated muzzle brake controls gas dispersion and reduces muzzle rise. It is effective in allowing the shooter to have faster follow up shots and has unbelievably soft felt recoil. It features blunt strike prongs and includes our nitride heat-treated collar jam nut.

NITRIDE HEAT-TREATED FLUTED BARREL

Proper gas regulation and lubricated mechanics are nothing without the precision and durability of a quality barrel. Our chrome alloy barrels are machined for absolute accuracy. Not only are they fluted for optimum heat dissipation but our barrels are nitride heat-treated for full corrosion resistance.

OVERSIZED HEAT SINK BARREL NUT

The patented oversized heat sink barrel nut is one of the most significant innovations. At three inches long it completely encompasses the chamber and throat area of the barrel where expanding gas temperatures peak. Take into account the radiation properties of aluminum compared to traditional steel and you have 17 times more heat dissipation than a standard AR. Our barrel nut's 3" length also gives the operating rod substantial guiding surface assuring constant positive contact with the bolt carrier. Our enhanced backbone receiver also move the upper's natural stress point forward. This adds a massive amount of rigidity to the overall platform and is critical when vertical fore grips are being pulled on the upper assembly.

ANTI-TILT BUFFER TUBE

Our mil-spec aluminum anti-tilt buffer tube features "carrier cradle" extensions to ensure that the carrier is always supported by the buffer tube even when the bolt carrier is fully forward. This prevents carrier tilt and premature wear of the buffer tube. The buffer detent now doubles as a lock that inhibits the buffer tube from rotating and becoming loose under adverse conditions. The anti-tilt buffer tube also features three drain holes.

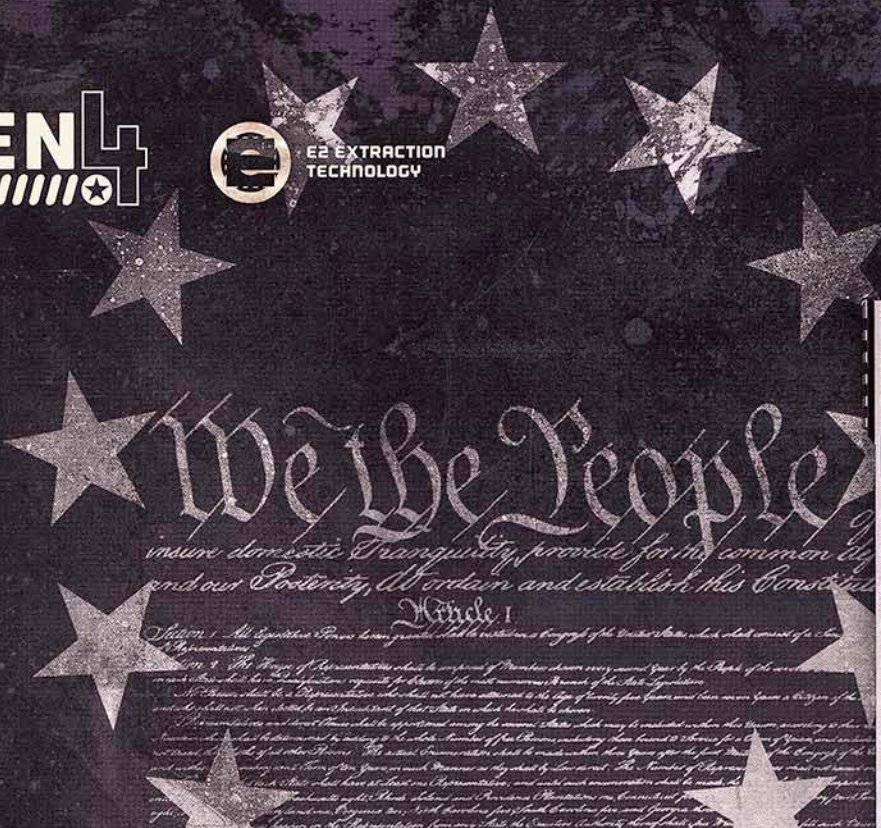

DROP IN TRIGGER SYSTEMS

Our single stage, non-adjustable drop-in triggers boast crisp 4 and 4.5 pound pull weights and are assembled in a red aluminum housing complete with urethane feet for immediate competition, hunting, and tactical applications right out of the box. Wire EDM cut from American A2 tool steel the trigger, disconnect and hammer are all nitride heat-treated for ultimate strength and corrosion resistance. All POF triggers come with KNS Precision stainless steel non-rotating anti walk pins specifically designed for our ambidextrous lower receivers.

ADJUSTABLE GAS SYSTEM

The POF adjustable gas system consists of three major components, the gas plug, gas piston and operating rod. Residual gasses behind the bullet are routed into the gas block which drives both the piston and the op rod rearward in turn cycling the firearm. Suppressors add back pressure to a firearms operating system and thus increase bolt speed. This causes premature wear on the firearm and can even result in the bolt catching the discharged casing also known as "stove piping". The POF gas system allows the user to restrict, and even shut off, this extra back pressure by simply rotating the gas plug.

P415

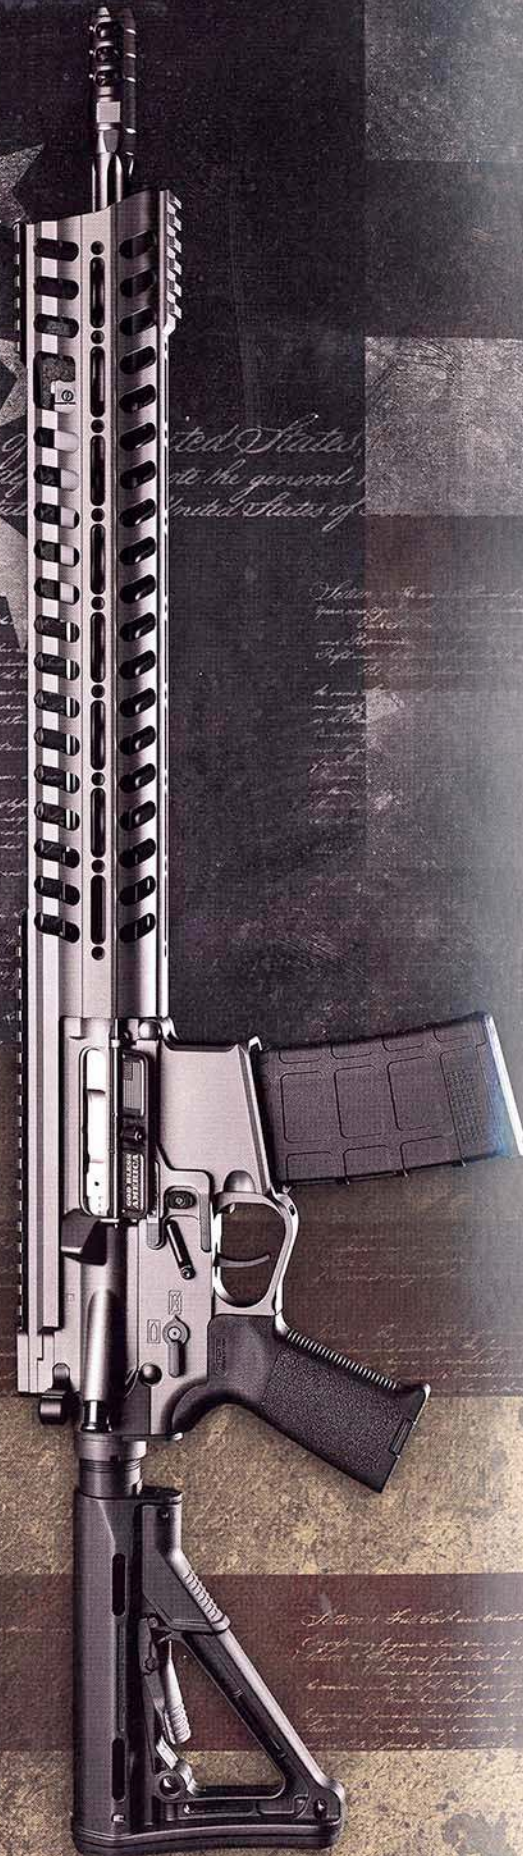

5.56X45 NATO

The P415 Series is the pinnacle of all-purpose 5.56 caliber sporting rifles. It is a product of continuous development and improvement to the AR platform that no other rifle company has attempted. E² Extraction Technology, complete ambidextrous fire controls, modular free floating rail platform, and numerous internal improvements make this rifle the last rifle you will ever have to buy. It simply will not fail when you need it most.

We the People

P308

7.62X51 NATO

Engineered and designed with the same innovation and durability as the P415 series, the P308 is truly the ultimate fighting machine. Don't sacrifice familiarity, speed, or accuracy when you need long range or high energy performance. Like the P415, the P308 features all of our Gen 4 upgrades such as E² Extraction Technology, ambidextrous fire controls, modular free floating rail platform, anti-tilt buffer tube, our M-LOK compatible M Rail, and more. The P308 is your best option for certainty in an uncertain world.

WARHOG

5.56X45 NATO /// 7.62X51 NATO

The War Hog can handle extreme environments. A rifle with tusks cut into the rail is reserved for the most dedicated of hunters. It's for those born with the primal need to hunt, and want to do it in style. Of course the tusk rail doesn't limit what you can do with the rifle, it's just one more way to connect with the game you hunt. There is no better way to celebrate and commit to your love of hunting, no matter what the game is.

POF-USA.COM

The Patriot Prayer...

DEAR GOD PLEASE HEAR MY PATRIOT PRAYER

*It was Your Will and Heart that guided the authors
of Our Constitution as each amendment was Created.*

*And it is with that heart, born out of a desire to
protect your flock against the evil of a fallen world
That I have chosen to exercise my God-given right to
carry a gun.*

*And I pray with every waking breath, with every
essence of my being,
That I am not called to use it.*

*But if I'm called to protect the flock,
Let my reaction be swift,
My training be true,
And my aim precise.
Allow my Training To Take over and Prevail The
Evil confronting me.*

*And if it is my day to return to you,
Oh, Father,
Before I go,
May innocents be saved and the evil destroyed.*

Amen.

THANK GOD I'M A PATRIOT!

PATRIOT ORDNANCE FACTORY, INC.
23011 N. 16th Lane – Phoenix, Arizona 85027 – 623-561-9572

POF-USA RELEASES THE SKIRMISH, A NEW RIFLE CONFIGURATION IDEAL FOR COMPETITION USE

PHOENIX, AZ (November 2014) – Patriot Ordnance Factory (POF-USA) is proud to announce The Skirmish, directly influenced by requests of competition shooters. This new configuration boasts an extended handguard, completely ambidextrous lower receiver and is available in light (.223cal/5.56mm) and heavy (.308cal/7.62.51mm) variations.

The Skirmish features a 14.5" M rail handguard which provides the necessary real estate for modern shooting positions. The M rail is unique in that additional rail sections are able to be mounted based on the shooters needs, or stripped off to reduce weight/size. If the top rails are removed from the M rail, the shooter has the ability to utilize optics with larger objectives and lower mounting options. This feature ensures solid cheek weld and increases point of aim consistency. Keeping with the desire for consistency, The Skirmish features a fixed Magpul MOE Carbine stock.

The Skirmish is a product of the Generation 4 series of rifles which feature completely ambidextrous controls including the safety selector, bolt catch, bolt release and magazine release. This new rifle also features our E² extraction technology. . E² extraction is a patented feature consisting of four channels along the neck of the chamber. The channels allow gas pressure to flow backwards and push on the shoulders of the spent casing resulting in extractor life of 5X that of a standard extractor due to the push / pull action. This feature will not damage the brass and will not affect the re-loading capability that most competition shooters require.

POF-USA is an Arizona-based small arms manufacturer known for its revolutionary concepts and radical approaches to engineering used to develop the finest piston driven AR-type rifles used by civilians and professionals worldwide. We are a market leader delivering a portfolio of regulated short-stroke gas piston operating rifles. We accept no compromise in the building of our product, known as "Patriot" designs. We will only produce that which is tough, accurate, modular, durable and true. This patriotic mission is brought from passion, authenticity, trustworthiness, rebellion, independence and objectivity. For more information, visit www.pof-usa.com or call 623-561-9572.

PATRIOT ORDNANCE FACTORY, INC.
23011 N. 16th Lane – Phoenix, Arizona 85027 – 623-561-9572

For Immediate Release

POF-USA RELEASES THE RATTLER AMBIDEXTROUS CHARGING HANDLE

PHOENIX, AZ (November 2014) -- Patriot Ordnance Factory (POF-USA) continues its commitment to providing completely ambidextrous rifles/components with the release of The Rattler, ambidextrous charging handle available for .223cal/5.56mm and .308cal/7.62x51mm AR type platforms.

The Rattler ambidextrous charging handle is a direct replacement for the standard AR type charging handle. This charging handle features an oversized serrated handle to make gripping/charging achievable in adverse conditions. It has been billet machined in the USA from American 7075 aluminum to exacting standards and finished with durable black Type III hard coat anodize. It is equipped with oversized latches on both sides to ensure a positive engagement whether you are palming or finger/thumb charging the weapon. MSRP: \$65.99

POF-USA is an Arizona-based small arms manufacturer known for its revolutionary concepts and radical approaches to engineering used to develop the finest piston driven AR-type rifles used by civilians and professionals worldwide. We are a market leader delivering a portfolio of regulated short-stroke gas piston operating rifles. We accept no compromise in the building of our product, known as "Patriot" designs. We will only produce that which is tough, accurate, modular, durable and true. This patriotic mission is brought from passion, authenticity, trustworthiness, rebellion, independence and objectivity. For more information, visit www.pof-usa.com or call 623-561-9572.

POF-USA RELEASES CARBINE RECEIVER ENDPLATE WITH AMBIDEXTROUS QUICK DISCONNECT SLING SWIVEL MOUNT

PHOENIX, AZ (November 2014) -- Patriot Ordnance Factory (POF-USA) continues its commitment to providing completely ambidextrous rifles/components with the release of our take on the carbine receiver endplate. Made from 6061-T6 aluminum and finished with Type III hard coat black anodize, this endplate is compatible with both MIL-SPEC and COMMERCIAL style receiver extensions (buffer tubes). As shown below, this product is compatible with standard push button sling swivels. MSRP: \$29.99

For Immediate Release

POF-USA RELEASES NEW RIFLE CONFIGURATION...A BOLT GUN, LEGAL IN ALL 13 COLONIES

PHOENIX, AZ (October 2014) -- Patriot Ordnance Factory (POF-USA) continues with an American Revolution in Innovation and brings out the ReVolt™. A new bolt action rifle, available in light (.223cal / 5.56mm) and heavy (.308cal / 7.62mm) variations for your shooting demands, which is legal in all 13 original Colonies.

These rifles feature a 14.5" M-LOK compatible handguard with 18.5" nitride heat-treated, deep fluted barrels. New to the market is the ReVolt™ action; a straight pull only action with feed assist chambering of the next round. The lightweight and popular Luth-AR buttstock is a standard feature on the new line.

POF-USA has maintained a focus on modularity – not only in the rifles, but also the accessories. The bolt action handle on the ReVolt™ models can be used as a tool for tightening and removing scope mounts and rail accessories. Muscle memory skills are virtually the same for this platform as a standard POF rifle, and all ambidextrous controls found in our Gen 4 series rifles are found in this loaded package. In addition to all of the fine features in our rifles, the ReVolt™ models also feature our E² extraction technology. E² extraction is a patented feature of four channels along the neck of the chamber. The channels allow gas pressure to flow backwards and push on the shoulders of the spent casing resulting in extractor life of 5X that of a standard chamber due to the push / pull action.

The ReVolt™ top end is available as a separate purchase and ships with a 10 round magazine and capture pin. This capture pin replaces the front pivot pin, permanently attaching the upper receiver to the lower receiver while maintaining the ability to "shotgun" the rifle for maintenance. The capture pin was essential in our quest to innovate a magazine fed, AR style, bolt action rifle that qualifies for ownership in all 50 states.

You can hunt with the ReVolt™ as a stand-alone weapon system or install the complete top end on your already existing mil-spec (.223cal / 5.56mm) lower half to maintain the legality necessary in owning an AR style rifle in many of the Colonies.

POF-USA accepts no compromise in the building of our product. Our line of rifles and accessories are "Patriot" designs. We will only produce that which is tough, accurate, modular, durable and true. This patriotic mission is brought from passion, authenticity, trustworthiness, rebellion, independence and objectivity.

ReVolt ... Will You?

POF-USA is an Arizona-based small arms manufacturer known for its revolutionary concepts and radical approaches to engineering used to develop the finest piston driven AR-type rifles used by civilians and professionals worldwide. PATRIOT ORDNANCE FACTORY, INC.
23011 N. 16th Lane – Phoenix, Arizona 85027 – 623-561-9572

Roller Cam Pin Upgrade Kit compatible with standard direct impingement bolt carrier groups.

PHOENIX, AZ – POF-USA does not settle for “the usual”. Upgrade your DI rifle with the roller cam pin upgrade kit and increase the longevity of your upper receiver.

The cam pin on a standard MIL-SPEC/DI rifle has a 4 sided, phosphate coated steel head. Phosphate provides very minimal corrosion resistance and no friction reducing characteristics. The roller cam pin included in our kit is a circular steel head that rotates; therefore the pin rolls along the inside of your upper receiver as opposed to dragging. The head of the roller cam pin is NP3 coated, which holds high corrosion resistance properties and extremely effective drag resistance capabilities. NP3 is extremely slick which cuts down on the wear of the upper receiver exponentially.

The new cam pins' enhanced shape compared to your standard cam pin requires you to change the gas key currently attached to your DI bolt carrier group. The roller cam pin upgrade kit includes this new gas key and all applicable mounting hardware. This dimension change does not play a role in performance. The new gas key simply allows enough clearance to remove the roller cam pin for cleaning/maintenance.

POF-USA is an Arizona-based small arms manufacturer known for its revolutionary concepts and radical approaches to engineering used to develop the finest piston driven AR-type rifles used by civilians and professionals worldwide. PATRIOT ORDNANCE FACTORY, INC.
23011 N. 16th Lane – Phoenix, Arizona 85027 – 623-561-9572

For Immediate Release

POF-USA RELEASES A NEW RIFLE CONFIGURATION...A DIRECT IMPINGEMENT RIFLE, THE OLDE SCHOOL.

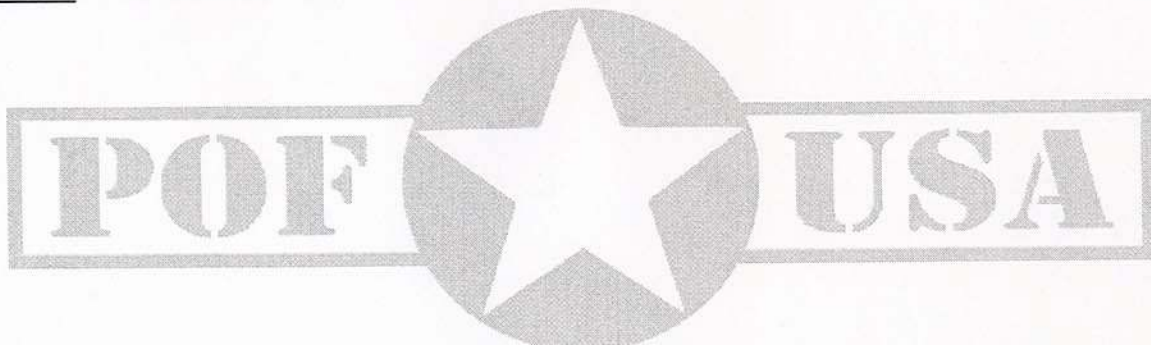

PHOENIX, AZ (January 2015) – Patriot Ordnance Factory (POF-USA) has taken the standard DI rifle and added a twist of innovation by replacing the standard stainless steel gas tube with a straight Inconel gas tube.

The Olde School is a direct impingement rifle offered in either a .223/5.56 or .308/7.62X51 configuration. This rifle features all the standard innovations that come on a Generation 4 series rifle including the E² chamber and completely ambidextrous lower receiver. The addition of the straight Inconel gas tube takes reliability to the max by nearly doubling the heat that the gas tube can sustain without rupture.

The Olde School features an adjustable gas system. POF-USA has taken the famous 3 position adjustable gas piston system and incorporated the adjustability into this direct impingement rifle. You now have the ability to regulate the gas for certain ammunition selection or the addition of a suppressor.

POF-USA is an Arizona-based small arms manufacturer known for its revolutionary concepts and radical approaches to engineering used to develop the finest piston driven AR-type rifles used by civilians and professionals worldwide. PATRIOT ORDNANCE FACTORY, INC.
23011 N. 16th Lane – Phoenix, Arizona 85027 – 623-561-9572

PHOENIX, AZ (December 2014) – Patriot Ordnance Factory is proud to announce the capability to add the patented E² dual extraction technology to any existing AR-15/AR-10 platform.

The E² dual extraction consists of 4 small channels cut into the walls of the chamber, allowing a small amount of gas pressure to flow backwards and push on the shoulders of the spent casing. This small pressure helps “un-seat” the spent case from the chamber while slightly pushing backwards as the extractor is pulling the case rearward. With this feature, the extractor is no longer doing all the work by itself; therefore the life of the extractor and overall reliability of the rifle system is increased.

POF-USA is an Arizona-based small arms manufacturer known for its revolutionary concepts and radical approaches to engineering used to develop the finest piston driven AR-type rifles used by civilians and professionals worldwide. We are a market leader delivering a portfolio of regulated short-stroke gas piston operating rifles. We accept no compromise in the building of our product, known as “Patriot” designs.
