Colt® 9mm Submachine Gun Combat Proven Family of Weapons

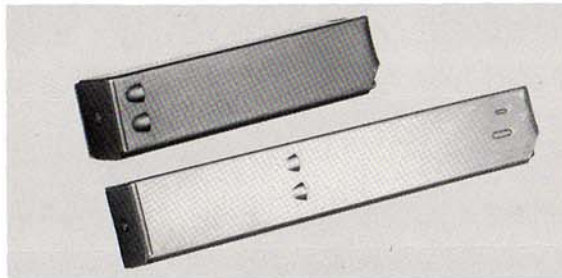

The Colt 9mm Submachine Gun is a light-weight compact weapon encompassing the same straight line construction and design of the world reknown Colt M16A2 rifle. This straight line construction, coupled with the low recoil associated with 9mm ammunition, provides highly accurate fire with less muzzle climb, especially in full automatic fire. Less recoil also facilitates ease of training and improves accuracy.

Like the M16A2 rifle, the Colt 9mm SMG fires from a closed bolt, is equipped with a sliding buttstock and is readily field stripped without the need for special tools. Operation and training is identical to that of the M16A2 Rifle, Carbine or Commando, eliminating the need for substantial cross training.

The Colt 9mm SMG has a 10.5" barrel, and fires all standard 9mm ammunition. It's extremely well suited for military and para military organizations with a definite need for a lightweight compact weapon required to turn out sustained and controlled fire in close confrontations. Also ideal in military and law en-

The sliding buttstock is much more rugged than the usual folding stocks found on most carbines. When extended, the butt is very rigid, allowing the SMG to be fired with the accuracy of a solid buttstock weapon.

Both 20 round and 32 round 9mm magazines are available for Colt's SMG.

forcement situations where maximum concealability and lower velocity are required.

The rear field sight is adjustable for windage, and incorporates two flip type apertures

SPECIFICATIONS-COLT 9mm SMG
