

# FOREWORD

## **A HISTORY OF PRODUCING OUTSTANDING MILITARY WEAPONS**

Since the late 1860's, and the advent of fully automatic weapons, Colt's has played a major role in the development of outstanding military weapons for the U.S. Armed Forces. For the past 100 years the U.S. Military has looked to Colt's for sophisticated, yet reliable, weapons. The result is an impressive roster of weapons developed by Colt's including the Model 1895 Browning, The Browning

Automatic Rifle (BAR), the 37MM air and land service automatic cannon, the .45 service automatic — Model 1911A1 and the M-16 automatic rifle. The model 1911A1 .45 service automatic is still the official sidearm of the U.S. Military forces. Its design is basically unchanged since its birth in the Philippine insurrection in the first decade of the 1900's.

## **THE M-16 — TODAY'S BASIC WEAPON FOR U.S. FORCES**

The Colt's M-16 automatic rifle was adopted for use by the U.S. Military forces in Southeast Asia in 1964. Since then Colt's has produced over two million M-16 s and has continued to make major design contributions toward improving the overall capability of the weapon. In addition, a number of accessories designed to result in a totally integrated weapons system have been developed. This catalog contains information on a variety of those accessories for

Colt's M-16 and AR-15 rifles. It is intended as a practical source of information for foreign nations who have adopted Colt's M-16 and AR-15 rifles. The catalog contains general descriptive and illustrative material on each accessory as well as specifications and preliminary operational guidelines. The range of accessories available includes equipment for making operational changes in the weapon and performing maintenance and repair.

## **ACCESSORIES FOR CREATING A FULLY INTEGRATED WEAPONS SYSTEM**

**THE MODEL M-3 BIPOD —**  
a lightweight stabilizing device

**THE .22 L. R. CONVERSION KIT —**  
adapts the M-16 for firing low cost .22 caliber cartridges

**THE BURST CONTROL MODIFICATION KIT —**  
adds another fire control mode to the M-16

**THE BLANK FIRING ADAPTER —**  
makes the M-16 operable with blank firing ammunition

**THE ARMORER'S KIT —**  
a complete kit for inspection, maintenance and repair of the M-16

**THE GUN RACK —**  
a maximum security storage facility for the M-16

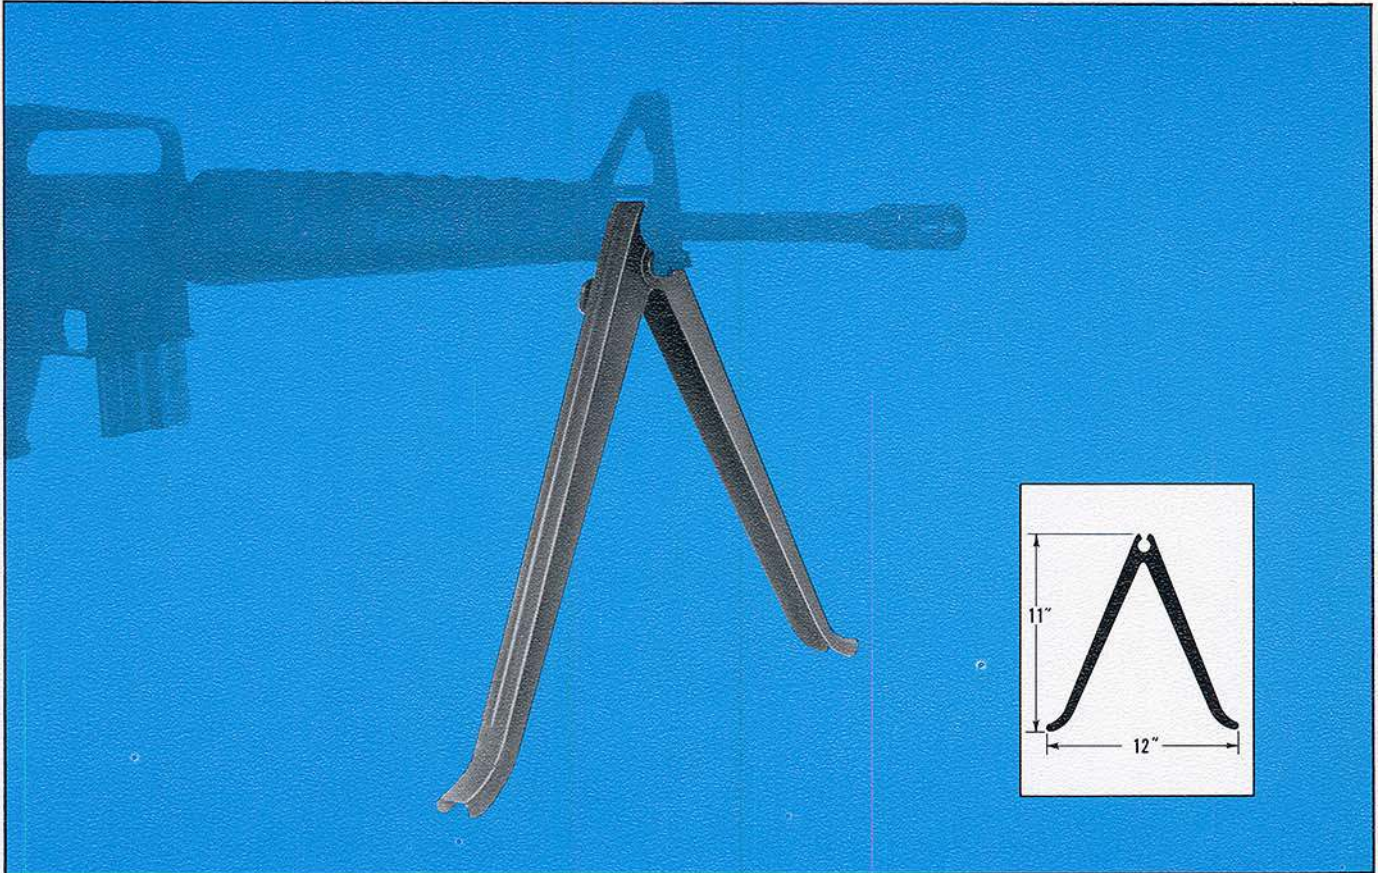

*All of these accessories can be used with no change in the basic weapon.*

*For additional information relative to any of the accessories, please direct inquiries to:*

# BIPOD

## MODEL M-3

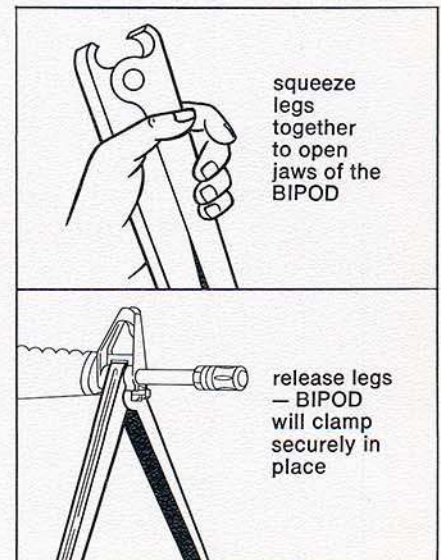

The US Model M-3 BIPOD is a lightweight, stabilizing device for use with the AR-15 Automatic Rifle. Use of the BIPOD aids in increasing accuracy and reduces operator fatigue when the weapon is used over long periods of time. The BIPOD clamps securely in place on the barrel and can be removed in seconds simply by squeezing the legs together. It is constructed of steel for long life under field conditions. It can be used with or without the bayonet in place.

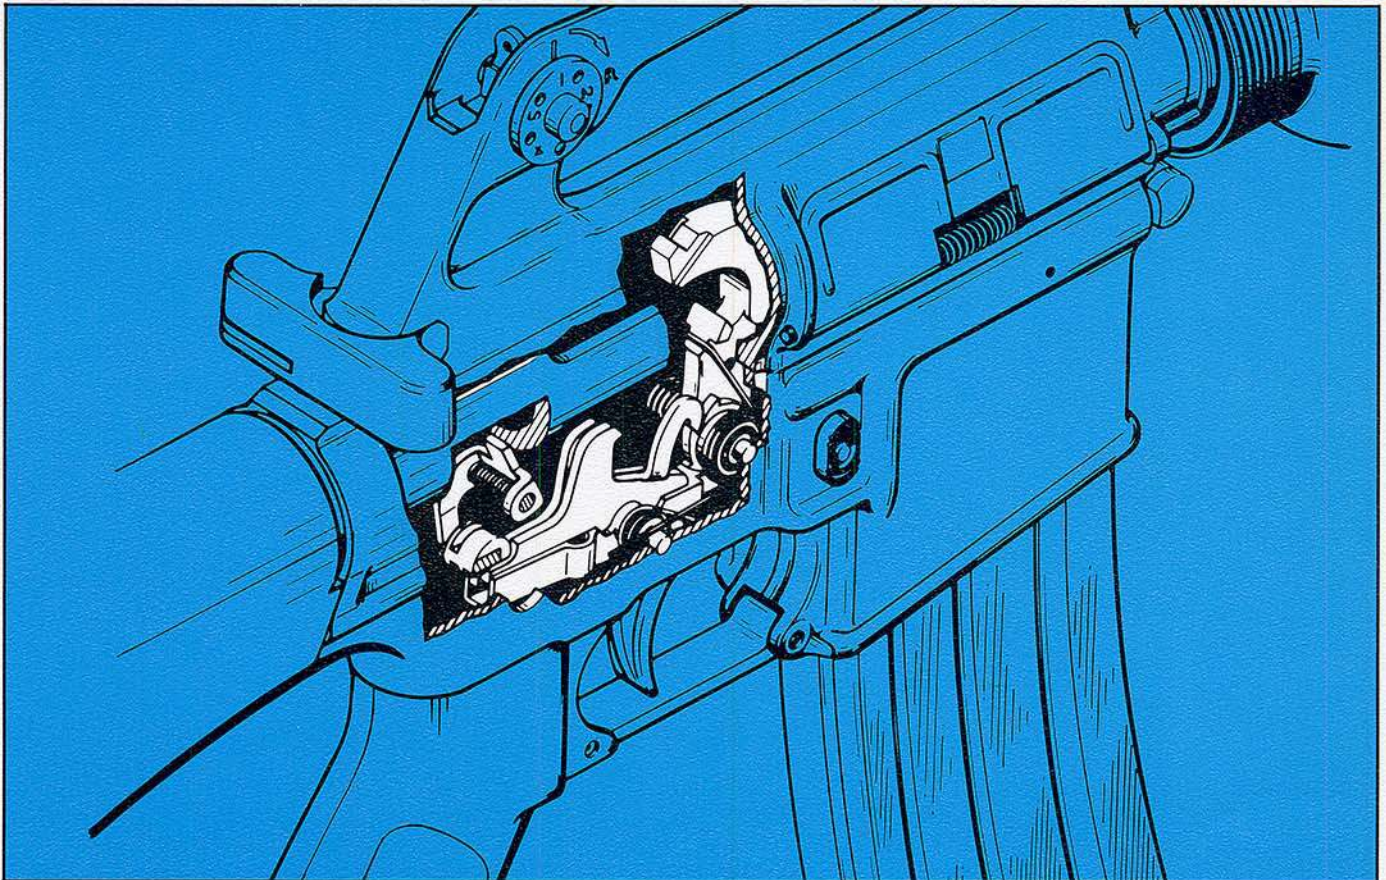

### features

- compact and lightweight
- clamps quickly and securely in place
- constructed of steel for durability
- easy to clean and maintain
- functions with or without the bayonet in place

### easy to attach

# BURST CONTROL MODIFICATION KIT

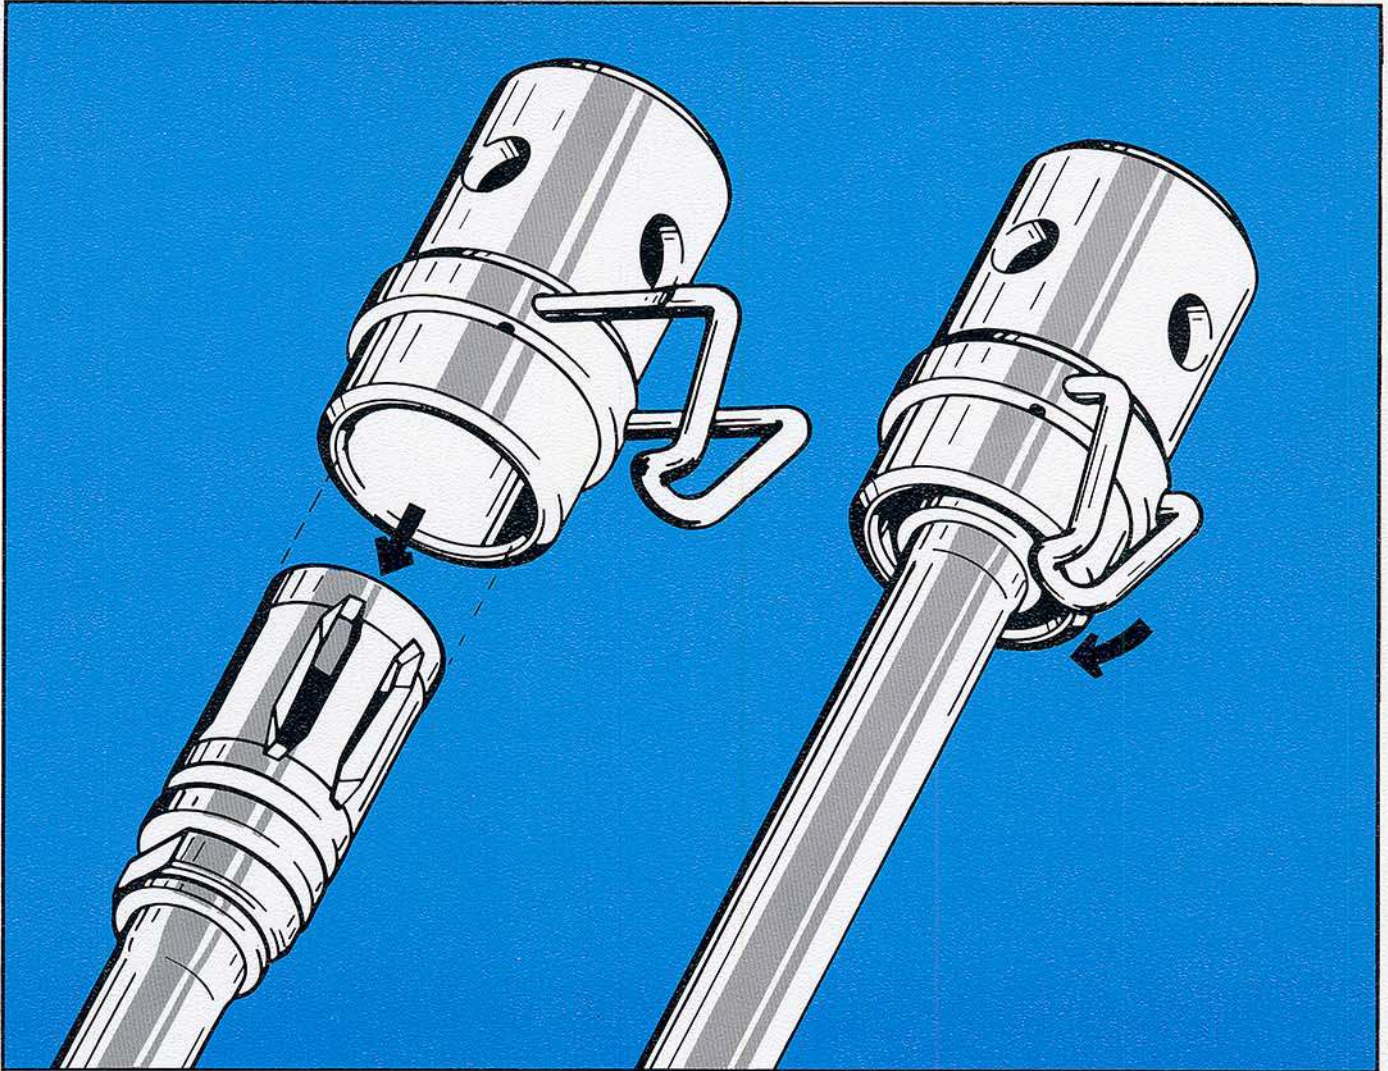

A complete kit, ready for installation without modifying the basic weapon, the burst control kit adds another fire control mode for all Colt's AR-15 automatic weapons. When installed, the operator has the options of firing automatically, semi-automatically, or in two or three round bursts. In addition to more firing versatility, considerable conservation of ammunition can be achieved. With the fire control selector in the BURST position, each pull of the trigger results in the full automatic fire of two or three rounds depending on whether the two-shot or three-shot cam is installed. Moving the selector control lever to either of the other two fire positions results in automatic or semi-automatic fire. The kit contains all parts, tools, and instructions necessary for installation.

## PARTS LIST AND NUMBERS

Standard Parts to be Removed		Kit Parts to be Installed	
Part No.	Nomenclature	Part No.	Nomenclature
61590	Sear, Automatic	GX-4940	Sear, Automatic
62317	Hammer and Hammer Pin Assembly	GX-5065	Hammer
		GX-4930 or GX-4999	Cam (two-shot) Cam (three-shot)
61697	Spring, Hammer	GX-5067	Spring, Hammer
		GX-4931	Spring, Cam
61955	Trigger	GX-5070	Trigger
62344	Disconnect	GX-5068	Disconnect (burst)
		GX-5071	Disconnect (semiautomatic)
61925	Spring, Disconnect (1 required)	61925	Spring, Disconnect (2 required)
		GX-5069	Spring, Aux. Disconnect
61959	Selector, Fire Control	GX-5066	Lever, Safety selector
		GX-6039	Decalcomania

# BLANK FIRING ADAPTER

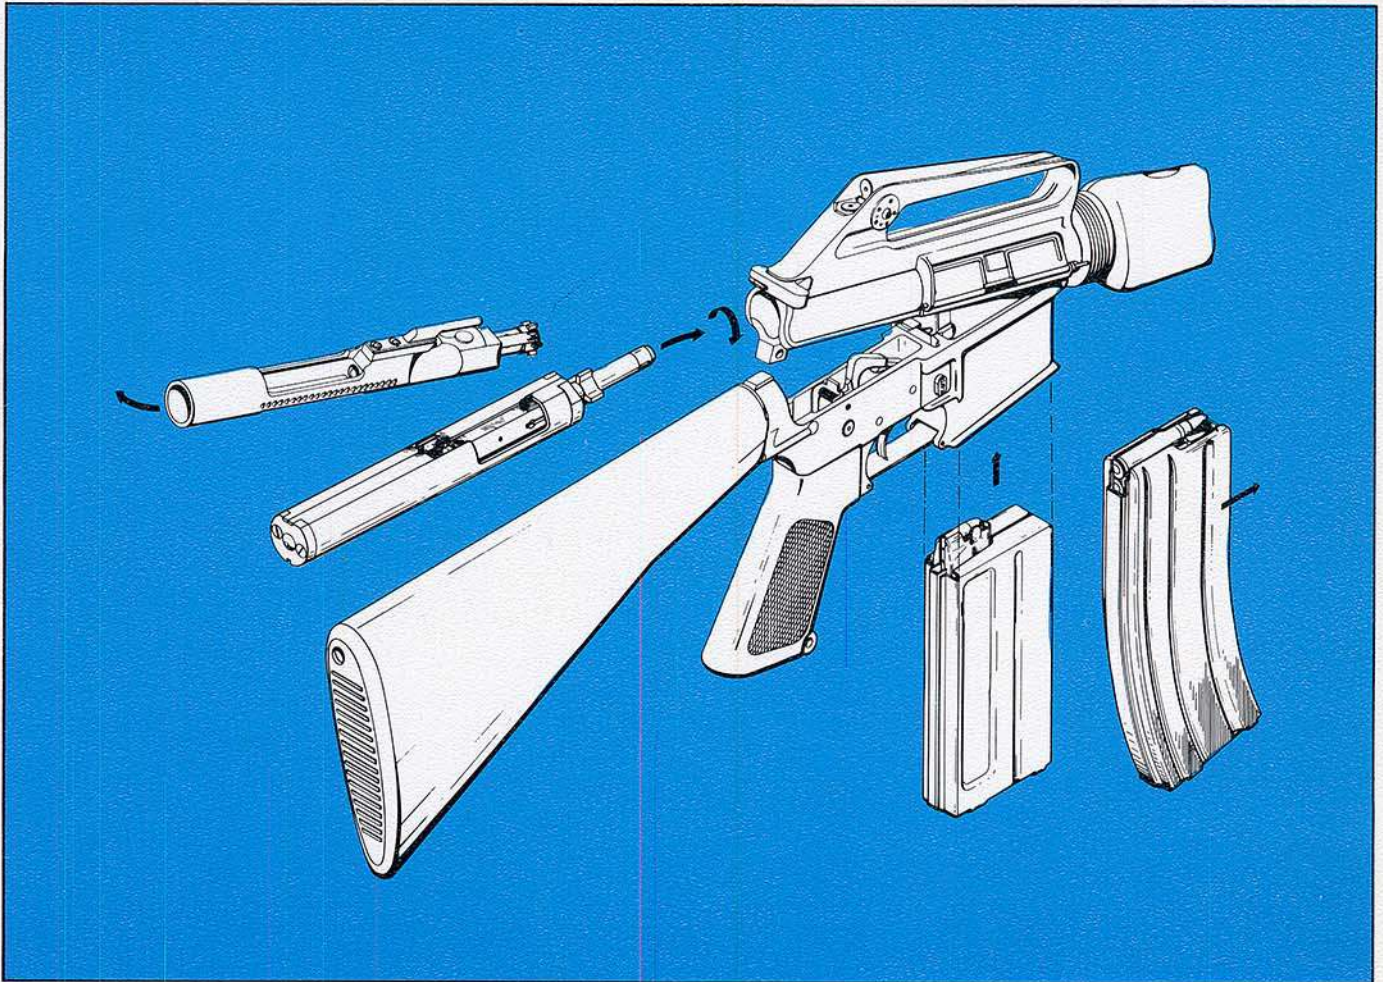

The Blank Firing Adapter is a simple, inexpensive device that makes the AR-15 operable with blank firing ammunition. Lightweight, durable, and simply constructed, it locks securely in place on the weapon's flash suppressor. It restricts gas flow at the muzzle providing the necessary pressure to insure proper weapon function. The adapter's bright red color makes identification in the field easy, important for safety reasons. It is easily cleaned and maintained with AR-15 cleaning and lubricating equipment.

## features

- makes the AR-15 operable with blank ammunition
- quick connect/disconnect operation
- locks positively to flash suppressor
- lightweight
- durable
- easily cleaned and maintained
- a frangible plug that prevents weapon damage if ball rounds are inadvertently fired

# CONVERSION KIT .22 L. R.

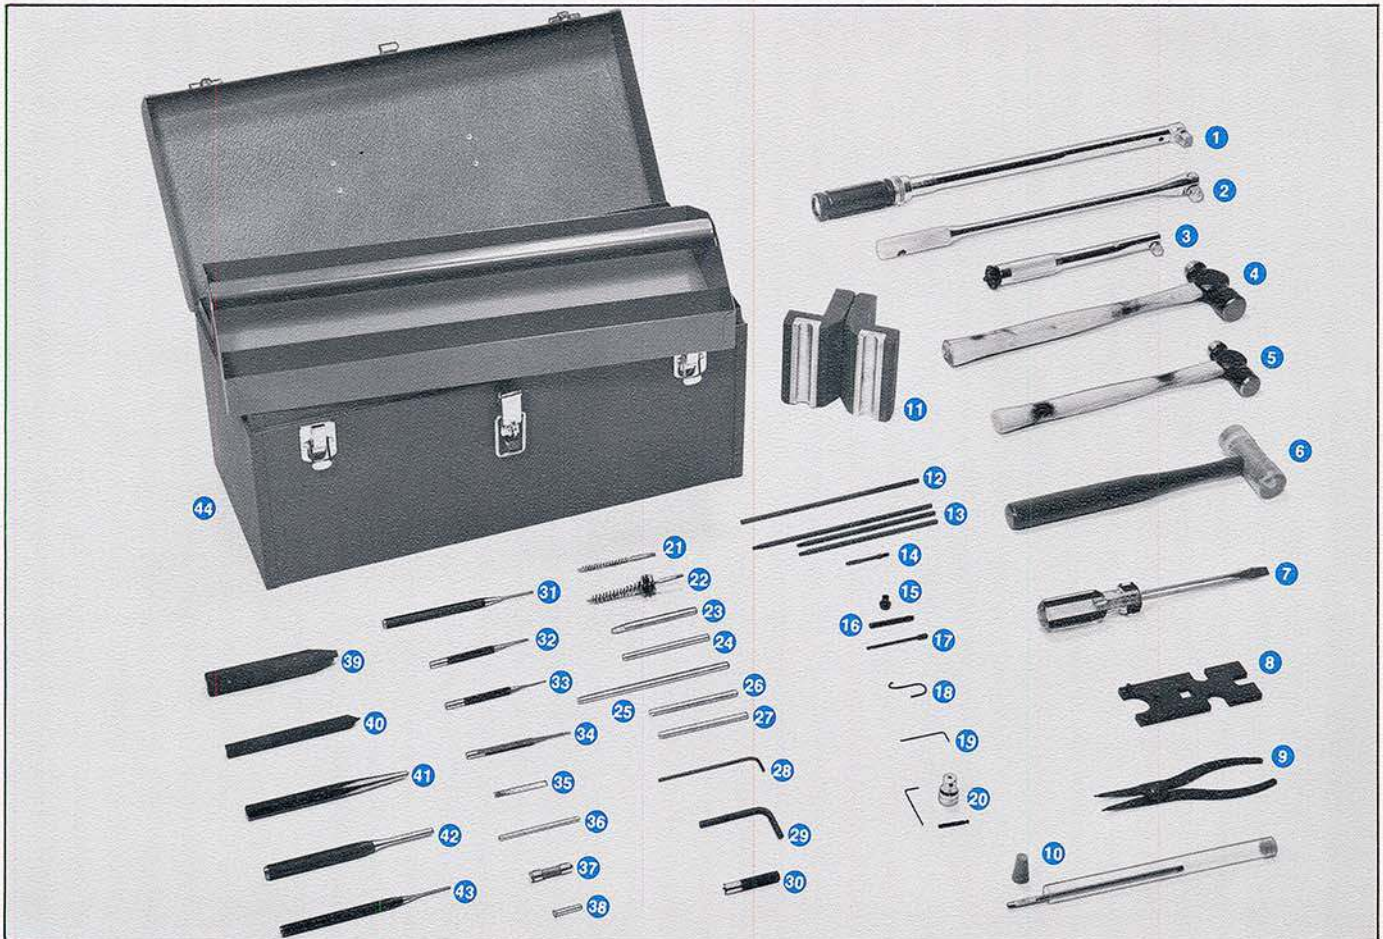

The Colt's .22 Conversion Kit makes possible firing low cost .22 Caliber long rifle rimfire cartridges in any of the AR-15 weapons. Substantial savings in ammunition costs can be realized during weapon familiarization and marksmanship training. The kit also allows the weapon to be used on indoor ranges. Conversion can be accomplished quickly and easily by removing the standard Bolt Carrier Group and replacing it with the one piece conversion assembly. No tools are required. Included in the kit is a .22 L. R. caliber magazine especially designed for rimfire ammunition. For safety reasons, weapons fitted with the Conversion Kit will fire only in the semi-automatic mode.

## features

- no tools required for conversion
- no modifications required to basic weapon
- unitized construction
- basic AR-15 Fire Controls retained
- semi-automatic fire only for safety
- low noise level

# ARMORER'S KIT

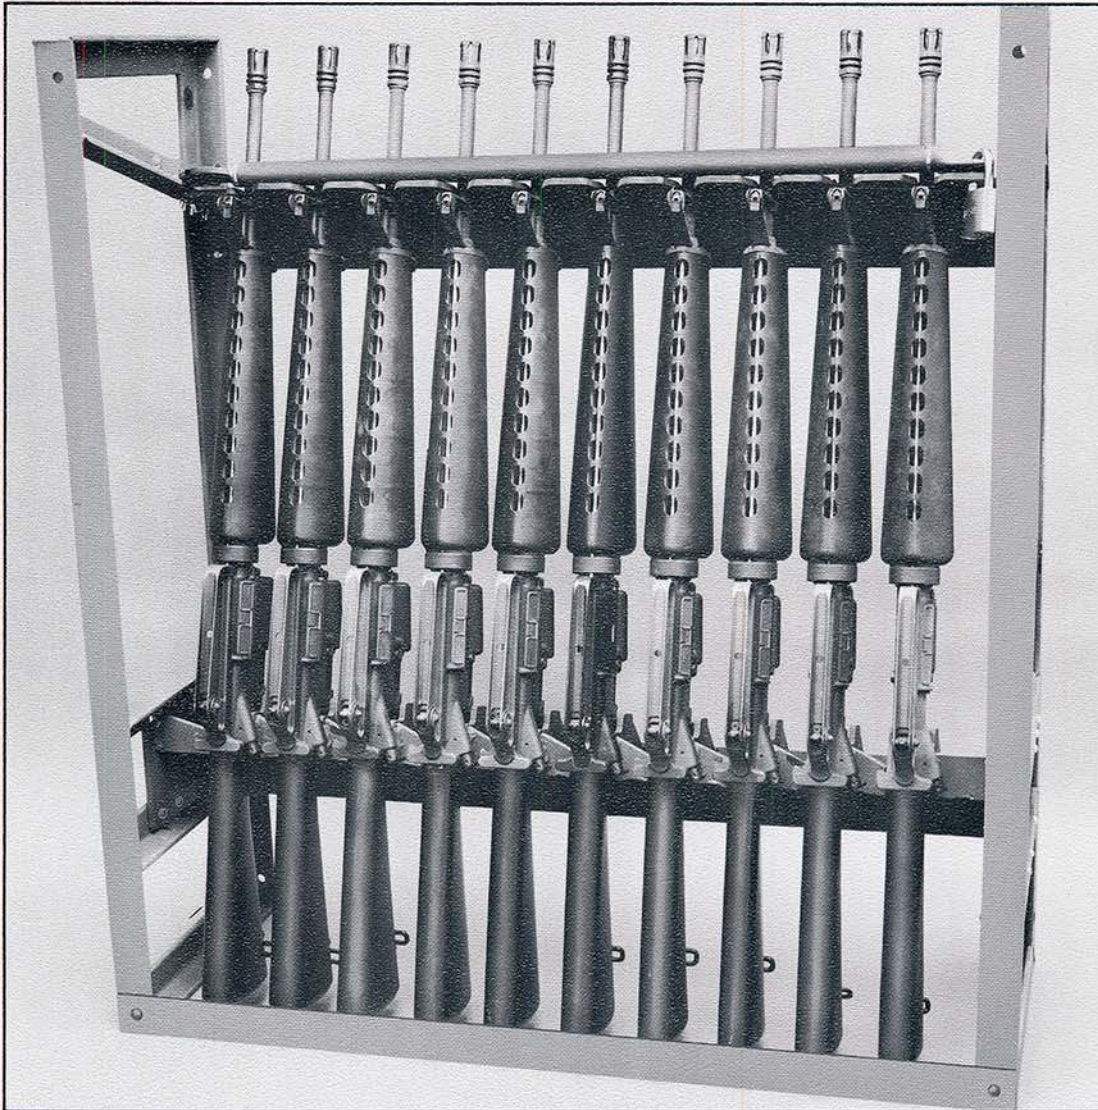

Colt's Armorer's Kit contains instructions and the necessary tools for inspection, maintenance and repair of the AR-15 Automatic Rifle. The kit is intended for use by the armorer and depot personnel as the information and instructions

provided are normally beyond the scope of tools and equipment available to the operator or his operational unit. Maintenance and repair on the Model M-3 Bipod and the Model M-7 Bayonet can also be performed with this kit.

Part No.	Description	Part No.	Description
1	94162 Wrench, Torque-Limiting, 1/2" Sq. Drive	23	62692 Setter, Punch (W/Flat)

22	94145 Brush, Chamber Cleaning	44	91414 Box, Tool, Steel

# GUN RACK

The Colt's Gun Rack is designed to store ten AR-15 weapons with maximum security. The rack will also accommodate AR-15 Rifles with 40 mm grenade launcher attached. For large storage requirements the racks can be attached end-to-end, back-to-back or in two-tier heights. The weapons are secured in the rack by inserting the pistol grip in a pocket cast in the lower support member. A locking bar at the top secures the barrel in a cut-out in the upper member. The racks are designed to be shipped disassembled.

## features

- constructed for maximum security
- available in aluminum or hardened steel
- can be assembled in multiples for large storage requirements
- easy field assembly
- compact: 39½" high; 35" wide; 13" deep
- five disassembled racks can be shipped in the space required for one assembled rack

# Colt M-16

## The world's finest military rifle

This is the Colt M-16 automatic infantry rifle. More have been produced and more are currently in use than any other rifle of its type. It is the only caliber 5.56 mm military rifle that has been extensively combat proven. Complete range of accessories available, including blank firing attachment and grenade launcher. Carbine and submachine gun variations also available. For complete information contact Colt's.
