LEWIS MACHINE & TOOL

For the past 26 years, Lewis Machine & Tool Company (LMT) has strategically partnered with various branches of the United States Armed Forces, government agencies and other firearm manufacturers to design, develop and test multiple systems and sub-systems. Our quality has become recognized domestically and internationally and we've earned the distinction of being a General Services Administration (GSA) Supplier.

GSA

Complete LMT firearms are available solely for military, government and law enforcement agency purchase. Each is built to your need using the semi-auto (Defender Model) featuring standard options, or full-auto (Guardian Model) with tactical accessory upgrades — you get a custom-built rifle at a standard production price. LMT weapons are exceptional foundations for building a total system that can be deployed in most any scenario yet maintain adaptability to new technology and accessories. For purchase information, please contact Lewis Machine & Tool Company at 309.787.7151.

DEFENDER & GUARDIAN WEAPONS SYSTEMS

GUARDIAN MRP

Defender model semi-auto and guardian full-auto rifles from LMT can be configured to virtually any specification for a multitude of scenarios.

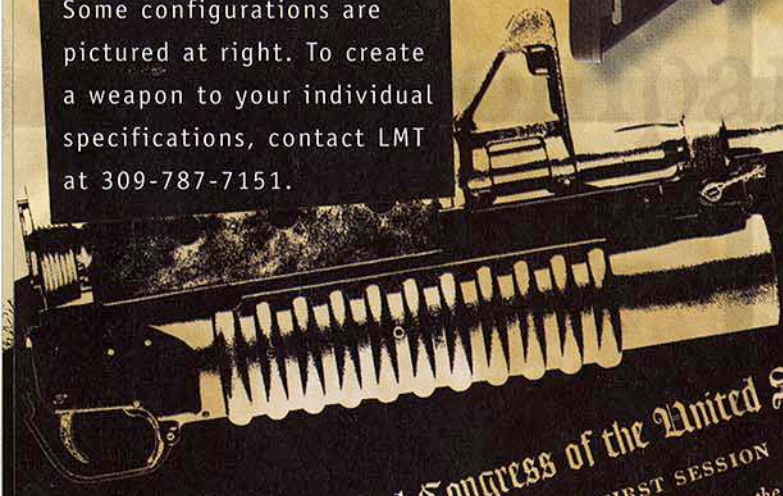

Other specification choices of LMT Defender/Guardian rifles include SOPMOD buttstocks, Generation 2 collapsing buttstocks and standard buttstocks.

Some configurations are pictured at right. To create a weapon to your individual specifications, contact LMT at 309-787-7151.

MRP EVOLUTION

NOW AVAILABLE IN C.S.

Designed and manufactured by Lewis Machine & Tool Company, the patent-pending Monolithic Rail Platform, or MRP, is the most radical variation of an integrated rail system ever conceived. This one-piece receiver/free-floating handguard/rail system is precision machined from a solid aluminum forging for absolute strength and consistency. The MRP completely replaces the upper receiver and provides an unprecedented level of versatility to the operator.

| MRP | Weight | Length |
|--------|---------|--------|
| 14.5" | 4.8 lbs | 22.75" |
| 16" | 4.9 lbs | 24.5" |
| 18" SS | 5.3 lbs | 26.5 |

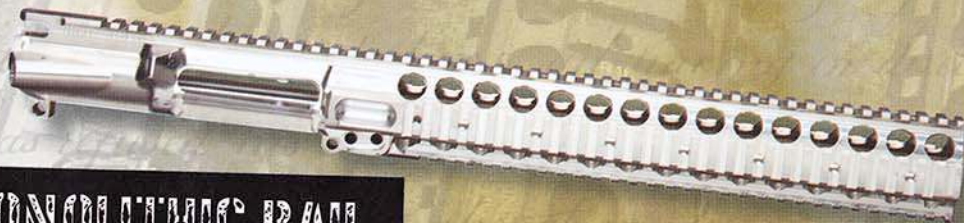

| CRIS | Weight | Length |
|--------|---------|--------|
| 10.5" | 3.9 lbs | 19.25" |
| 14.5" | 4.5 lbs | 22.75" |
| 16" | 4.6 lbs | 24.5" |
| 18" SS | 4.9 lbs | 26.5" |

Congress of the United States of America

The MRP begins as a rock-solid forging for unmatched strength and durability. Each rail is then precision machined for over five hours to expertly accommodate the latest white light, infrared and laser illuminating devices used by military spec-ops and law enforcement SWAT teams. Finally, it is given a rugged finish to ensure longevity and performance.

ALUMINUM FORGING

SEMI-CUT MONOLITHIC RAIL.

MONOLITHIC RAIL. PLATFORM JUMPER RECEIVER

MRP UPPER HALVES

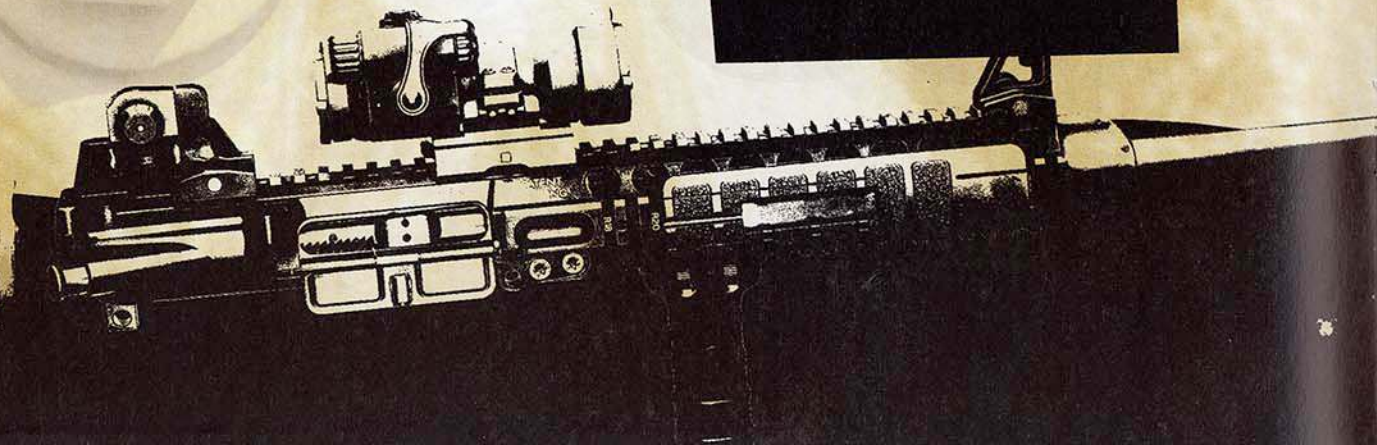

Monolithic Rail Platform upper receivers are available in two versions — the standard MRP or the CQB (Close Quarter Battle) MRP. Our standard rifle length MRP offers 20 1/2" of Mil-Std 1913 rail length on top; the CQB MRP upper receiver has 16 1/2" of continuous Mil-Std 1913 top rail surface.

For an additional charge, MRP upper halves will include LMT's enhanced bolt — machined from stronger material with dual extractor springs and a more aggressive extractor claw.

- Free-floating barrel
- No loss of zero from rough handling
- Reduced temperature to handguard & optics
- Increased barrel life
- Easy-to-access/clean design
- Straight gas tube resists bending and retains better alignment with gas key
- Reduced number of parts
- Quad Mil-Std 1913 rails
- Top rail position matches M4 & E3-type weapons ensuring optics and sight compatibility
- Accepts standard & enhanced M16-type (Stoner design) components

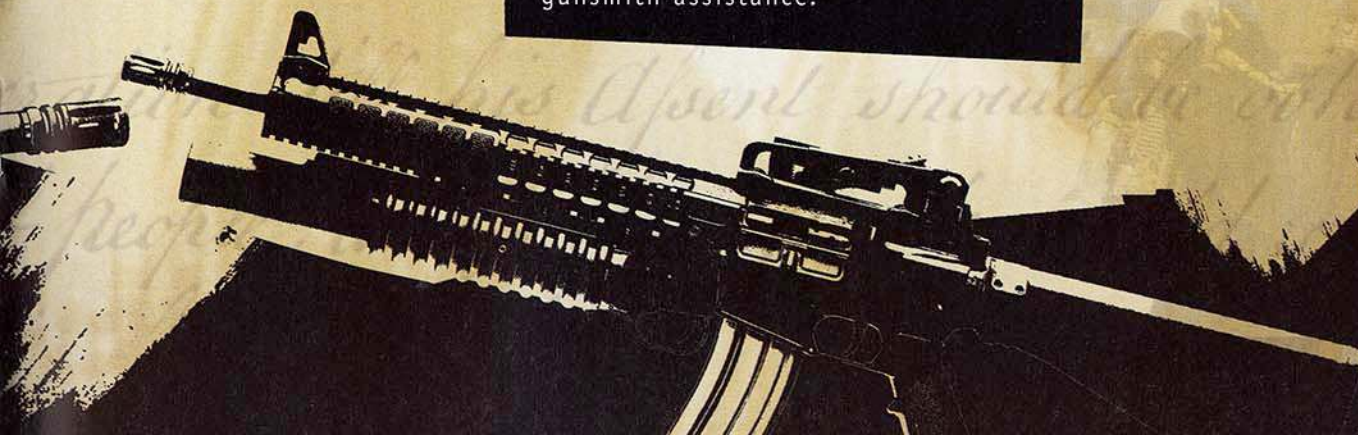

United States of America;

BARREL OPTIONS

Barrel options in chrome lined are 10 1/2", 14 1/2" or 16" lengths; all chrome-lined barrels are 1:7" twist machine gun barrels. If you prefer stainless, we have 16" and 18" stainless MRP-style barrels as an upgrade option. All barrels are proofed and mag particle inspected. MRP and CQB/MRP barrels, bolts and mags now available in 6.8. Call LMT for more information

With the proper installation wrench, an operator can customize his rifle for the mission at hand without armorer or gunsmith assistance.

ACCESSORIES

M203 MOUNTING HARDWARE KIT

Includes hardware, handguard and leaf sight to equip a standard rifle or M4-type carbine with the M203 grenade launcher.

BATTLEGRIPS AND RAIL PANELS

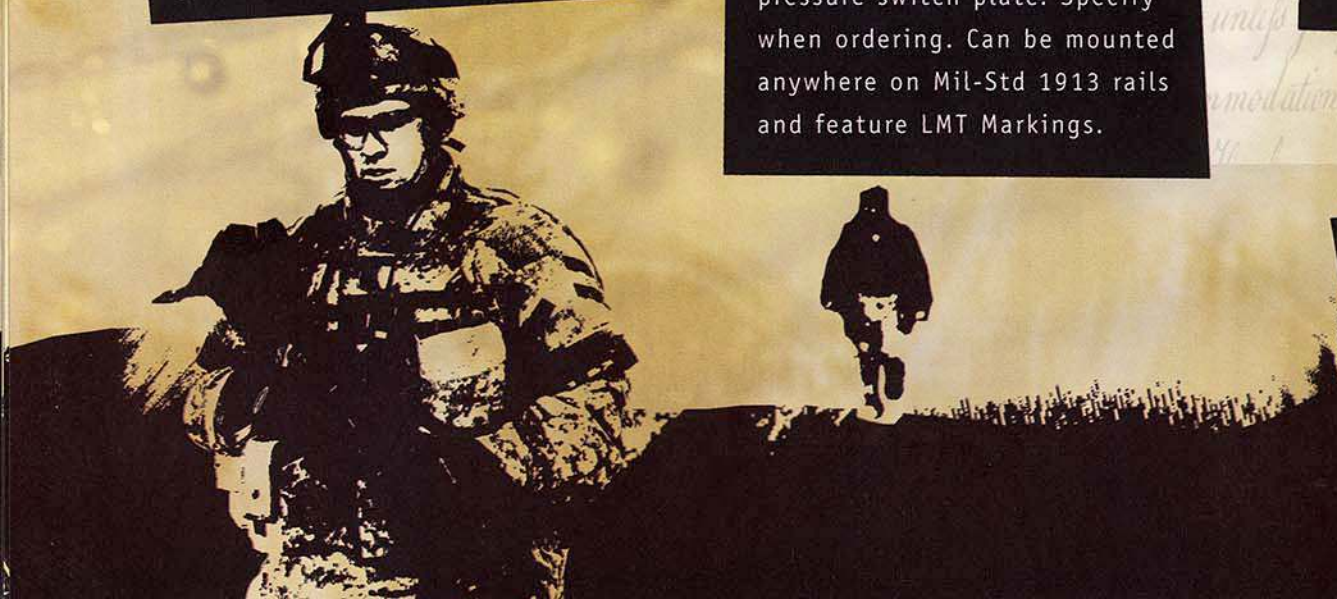

Vertical Battlegrip can be positioned anywhere on our MRP. They offer dual locking bar, integrated pressure switch pocket and waterproof internal storage unit. Rail Panels are available with and without the pressure switch plate. Specify when ordering. Can be mounted anywhere on Mil-Std 1913 rails and feature LMT Markings.

TACTICAL ADJUSTABLE REAR SIGHT

The LMT tactical adjustable rear sight offers a co-located sight picture to back up reflex sight systems. Forward and backward compatible with M16-type weapons families. Robust design and removable to fit any Mil-Std 1913 rail. Adjustments match current M4-type operation both in function and capability.

QUADRANT GL. SIGHT

Designed for weapons using M203 grenade launcher. Mounts directly to the side of a detachable carry handle or fixed A2 style upper receiver. Range up to 450 yards.

QUICK-DETACH AMBI SLING SWIVEL

Enables the operator to choose right or left-hand sling mounting. Available to fit the A2 standard buttstock or the carbine collapsing buttstock. M4-type rear mounting for weakside access. Sling swivels do not increase length of pull and no disassembly of weapon required to install.

DETACHABLE SIGHTS

Iron sights for co-located sight picture to back up reflex sight systems are available as detachable carry handles, tactical front sights and tactical adjustable rear sights. Choose the options that best fit your needs.

M2 TRAINING BOLT

The M2 training bolt allows an operator to train with a more economical, lightweight training round that can be used indoors. (Training rounds not included.)

30 ROUND AIR MAGS

Durable and dependable... otherwise we wouldn't offer them under the LMT name.

REBAR CUTTER

Rebar entry attachment designed for military, government and law enforcement agencies to gain entry through rebar after a reinforced wall has been breached.

ACCESSORIES & BUTTSTOCKS

BOLTS, CARRIERS & CHARGING HANDLE ASSEMBLIES

LMT offers not only standard bolt assemblies and carriers, but also the Enhanced bolt family — designed to improve historical problems with ejection, extraction and lack of function in harsh environmental conditions. Enhanced carriers incorporate a longer dwell time allowing barrel pressure to be greatly reduced and promoting easier extraction. The enhanced bolts have a more resilient coating and refined heat treat, as well as the cartridge case being fully supported by the bolt face. Our enhanced extractor has a “lobster tail” appearance and offers a double spring system. Also pictured is the charging handle assembly, available for separate purchase.

BUTTSTOCK PARTS

SOPMOD buttstocks and Generation 2 collapsing buttstocks are available as assemblies or individual units. LMT buttstocks are designed to fit the mil-spec M4-type extension tube. Extension tubes, buffer nuts/plates, heavy carbine buffers and action springs all available for separate purchase.

SOPMOD BUTTSTOCK

Improved cheek weld for better shooting position. Watertight battery storage compartments. Padded buttplate reduces felt recoil and provides no-slip surface against web gear and body armor. LMT is the sole provider of the SOPMOD Buttstock to the US Special Ops Command, US Army, US Navy, US Air Force, US Marine Corps and other government agencies and bureaus. Five length of pull settings.

GENERATION 2 BUTTSTOCK

Redesigned by LMT for firing large calibers and grenades. Features improved cheek weld and rear sling swivel. Five length of pull settings.

GRENADAE LAUNCHERS

M203 GRENADAE LAUNCHER

M203 RAIL MOUNTED GRENADAE LAUNCHER

Proprietary launcher designed for use with the LMT Monolithic Rail Platform & other 1913 rail systems. Suitable to handle the recoil of the 40mm round. Easy to install, field removable, low-profile design.

LMT is an approved contractor for the M203, manufacturing them to government specifications. Range to 400 meters. Usable with all 40mm rounds (including flare, smoke, training and incendiary rounds). GL photo for visual reference of handguard and leaf sight only.

SHIPPING AND HANDLING INFORMATION

Due to the large volume of orders we process, all orders for in stock product will be shipped in the order received. We attempt to ship within five business days (business days do not include weekends or holidays). All orders are shipped via ground UPS and will normally arrive between five and seven business days after shipment. Some items, because of weight and size, may require additional shipping charges and may take longer to arrive. Our shipping rate chart is an average; we will notify you if there is a difference in your shipping charges prior to shipping.

Shipping rates to Alaska and Hawaii are slightly higher.

OVERNIGHT AND SECOND DAY SHIPMENTS

We will attempt to ship overnight or second day air orders if the order is received before 3pm central time. All requests for expedited orders must be made by telephone.

INTERNATIONAL ORDERS

Please call or e-mail sales@lewismachine.net for shipping information. All international orders must have the following documents, at a minimum: purchase order, approved import license (if applicable in your country) and DSP83.

COD CHARGES

COD charges will apply according to current COD rates and policy from the shipping company. As of January, 2006 UPS has updated their COD policy and now apply a COD charge per package, not shipment. UPS is our primary shipper; we do however ship Fed Ex and USPS. We attempt to ship orders complete, however partial shipments are necessary at times.

ORDERING INFORMATION

DAMAGED GOODS

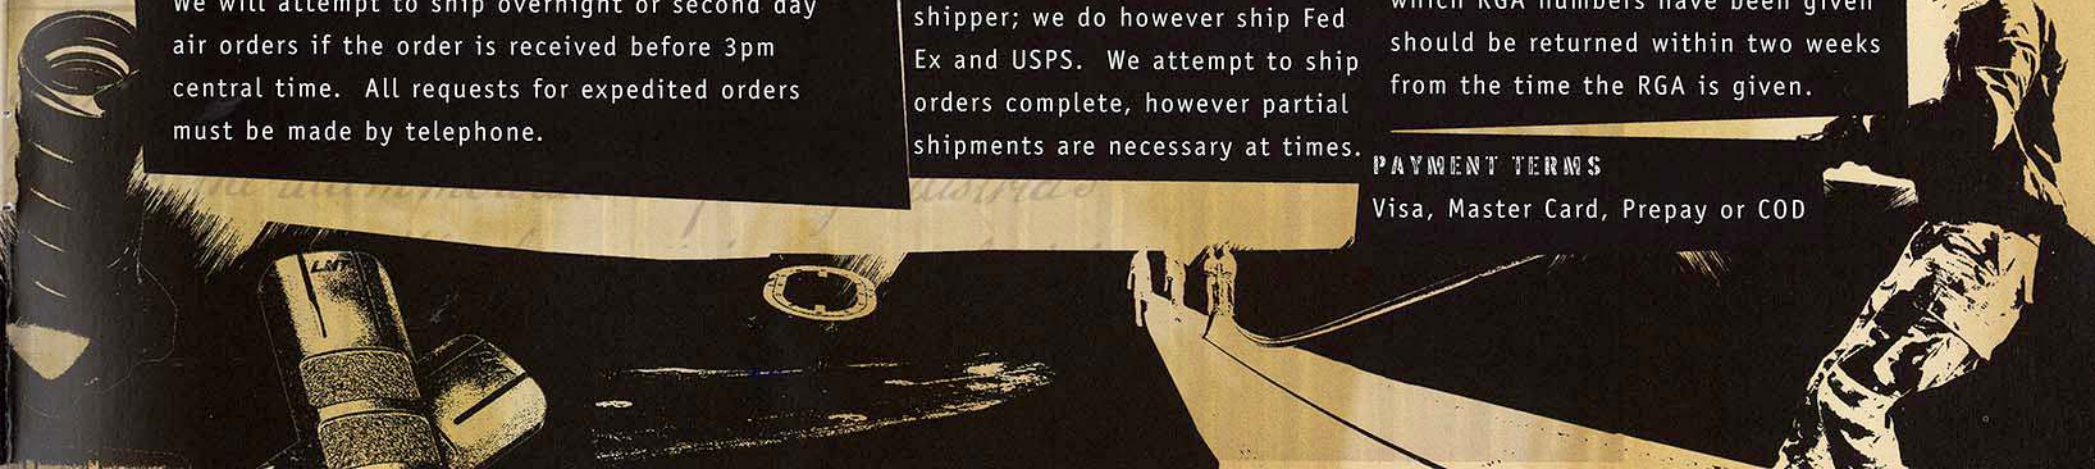

Any damaged shipments must be reported to Lewis Machine & Tool immediately for proper claim handling.

RETURNS

Lewis Machine & Tool utilizes a return goods authorization program. Please contact LMT within 30 days of receiving product in order to get a return goods authorization. You must contact the company via e-mail, fax or phone to get an RGA (Return Goods Authorization) number, along with return instructions, prior to returning the product. Product for which RGA numbers have been given should be returned within two weeks from the time the RGA is given.
